

Human dimensions of management (regulatory and policy)

1. Incentives for tanoak removals, e.g., development of markets
2. Utilization of infected trees
3. Applying our understanding of resistance to actual management decision-making
4. Alleviating costs imposed by quarantine on cone-collecting activities
5. Investigating methods to induce nurseries to propagate their own plants rather than importing stock
6. Assessing effectiveness of current regulatory structure and how to improve communication between regulatory entities
7. Comparison of regulatory responses and replication of the best ones throughout the range of *P. ramorum*
