California produces 97% of the fresh grapes grown in the United States

Per Capita consumption of fresh grapes in the U.S. is between 7 and 8 pounds per person

T able grapes have been known to improve the blood flow and heart pumping capacity, and reduce the area of tissue death after a heart attack

T able grapes protect the heart and blood vessels against oxidative tissue damage, similar to the known effects of red wine

Juice from grapes has many benefits for a healthy cardiovascular system

Harvey Kellogg, the corn flake king, was a great believer in grapes as a cure and in 1870, at his famous clinic, he prescribed 10 to 14 pounds of grapes per day - and nothing else - to cure patients of high blood pressure

Direct Marketing and Organic Farming

Direct Marketing Program

Direct Marketing is a system that allows Certified Producers to market their produce directly to consumers via Certified Farmers Markets. The Agricultural Commissioner/Sealer's Office regulates this program to insure that only certified produce is sold at Certified Farmers Markets.

Certified Farmers Markets	2
Certified Producers	67

Registered Organic Grower Program

Producers and growers who market their produce as "Organic" or "Organically Grown" must register their organic fields with the state. The County Agricultural Commissioner/Sealer's Office inspects these fields to insure compliance with applicable laws and regulations.
