

Yolo County 2010 Agricultural Crop Report

2011 National Ag Week Art Contest Winner

Angelina Wedding, 3rd Grade Winner, Whitehead Elementary School

Celebrating the Processing Tomato

50 years as "King of Crops" in Yolo County

Yolo County

Department of Agriculture and Weights & Measures

“We exist to satisfy the needs of our clients not just to produce an output.” (Unknown Author)

Yolo County Mission

Leaders in vibrant, safe and healthy communities. We:

- champion job creation and economic opportunities
- preserve and support agriculture
- protect open space and the environment
- enhance and sustain the safety net
- provide fiscally sound, dynamic and responsive services
- collaborate to maximize success
- capitalize on our unique assets
- advance innovation

Department Vision, Mission and Values

Vision

Our vision is to serve agriculture, the business community and the residents of Yolo County, through collaboration and partnership using the most efficient, effective and progressive means available, doing our part to ensure Yolo County has preserved agriculture and is a safe, healthy, and enjoyable environment in which to work, play and live.

Mission

Our mission is to promote and protect Yolo County agriculture and the environment, ensure the health and safety of our residents, and foster confidence and equity in the marketplace through the fair and equitable enforcement of the laws, regulations, and ordinances enacted by the people of the State of California and the County of Yolo.

Values

Employees of the Department of Agriculture and Weights & Measures, in an effort to accomplish the Department's Vision and Mission, share these values in the course of our work and our employment with Yolo County:

- Honesty
- Integrity
- Trust
- Enthusiasm
- Courtesy
- Customer Service
- Initiative
- Good Stewardship of Scarce Public Resources
- Continuous Improvement
- Personal and Professional Growth
- Respect and Tolerance of the Rights and Beliefs of Others

John Young
AGRICULTURAL COMMISSIONER
SEALER OF WEIGHTS AND MEASURES

September, 2011

Karen Ross, Secretary, California Department of Food & Agriculture
and Honorable Board of Supervisors, County of Yolo

Pursuant to the provisions of Sections 2279 and 2272 of the California Food and Agricultural Code, I am pleased to present the Yolo County Crop Report for 2010. This annual publication summarizes the acreage, production and valuation of Yolo County's agricultural commodities. These figures denote gross value of production and do not attempt to reflect net farm income.

The gross value of Yolo County's agricultural production for 2010 was \$443,541,692, which represents a decrease of 4% from the 2009 crop values. This decrease reflects the marked decrease in processing tomato values from 2009.

While processing tomatoes remain Yolo County's leading commodity, the production value decreased approximately 31%, or roughly \$39,800,000, due to decreased acreage, lower gross production per acre, and a reduction in price per ton as a result of increased production in southern growing regions which had been impacted by prior year water shortages.

Rice production increased 5% as water restrictions in the western region of the county were lifted, allowing for the return of planting in that area. Wine grape values dropped 19% primarily due to increased inventories in a weak economy. Hay, organic production, walnuts, almonds, corn, wheat, and cattle and calves rounded out the top ten crops for 2010.

I would like to express my appreciation to all the farmers, ranchers, and agencies who contributed vital data making this report possible. Special recognition for the compilation of this report goes to Jenni King, Beth Gabor, Leslie Churchill, Dennis Chambers, and all the staff that assisted in gathering the information.

To see this or any previous crop reports online, or to learn more about the programs and services provided by the Yolo County Department of Agriculture, visit: www.yolocounty.org (go to: Government > Agriculture & Cooperative Extension).

Respectfully submitted,
John Young

Agricultural Commissioner

(916) 744-1120

Saturday and Sunday 12:00 p.m. to 5:00 p.m.

Turkovich Family Wines

304 Railroad Avenue, Winters

(530) 795-3842

Thursday 12:00 p.m. to 8:00 p.m.

Friday and Saturday 12:00 p.m. to 9:00 p.m.

Sunday 12:00 p.m. to 5:00 p.m.

Yolo County Community Supported Agriculture

Community Supported Agriculture (CSA) consists of members or “shareholders” of a farm or garden who cover the anticipated costs of the farm operation and farmer's salary. The consumer joins a CSA program and purchases, in advance, a share of the farm's crop, and in exchange is provided a part of the crop each week, delivered to a predetermined spot, usually near the customer's home or worksite.

Farm Fresh to You

Founded in 1976 by pioneer organic farmer, Kathleen Barsotti, the farm, Capay Fruits & Vegetables, is now owned and managed by her four sons. They grow a wide variety of organic fruits, vegetables and flowers and serve over 4,000 CSA members.

23808 State Highway 16, Capay, CA 95607
(800) 796-6009

Commodity Summary

Commodity	2010	2009	2008
Field Crops	\$131,734,581	\$121,880,786	\$195,742,081
Vegetable Crops	106,320,261	136,067,622	113,446,888
Fruit & Nut Crops	55,858,293	56,245,730	53,968,428
Wine Grapes	45,649,602	56,423,575	41,983,918
Seed Crops	40,738,417	33,424,720	35,184,445
Organic Production	26,243,200	22,824,388	21,742,344
Livestock & Poultry	16,821,447	15,696,153	15,642,409
Apiary, Livestock & Poultry Products	10,743,357	9,657,848	14,732,447
Nursery Products	9,432,534	9,912,127	9,297,455
Total	\$443,541,692	\$462,132,949	\$501,740,415

Sustainable Agriculture Report 2010

Biological Control

<u>Pest</u>	<u>Agent/Mechanism</u>	<u>Scope of Program</u>
Puncture Vine <i>Tribulus terrestris</i>	Seedhead Weevil <i>Microlarinus lareynil</i>	Countywide
Yellow Starthistle <i>Centaurea solstitialis</i>	Seedhead Weevil <i>Bandastemus orientalis</i>	Countywide
	Hairy Weevil <i>Eustenopus villosus</i>	Countywide
	Yellow Starthistle Rust <i>Puccinia jaceae var. solstitialis</i>	4 sites
Ash Whitefly <i>Syphoninus phillyreae</i>	Parasitic Wasps <i>Encarsia partenopea</i>	Countywide

Pest Detection

<u>Pest</u>	<u>Number of Traps Deployed</u>	<u>Pest</u>	<u>Number of Traps Deployed</u>
Apple Maggot	86	Light Brown Apple Moth	185
Asian Citrus Psyllid	31	McPhail Traps – Fruit Flies	41
European Grapevine Moth	359	Mediterranean Fruit Fly	116
Glassy-Winged Sharpshooter	133	Melon Fruit Fly	32
Gypsy Moth	145	Oriental Fruit Fly	31
Japanese Beetle	30	Vine Mealybug	32
Khapra Beetle	245		

Pest Exclusion

<u>Pest</u>	<u>Type of Shipment</u>	<u>Inspections/Rejections</u>
Various Pests	Truck Shipments	79/0
Gypsy Moth	Household Goods Shipments	8/0

<u>Crops</u>	<u>Mechanism</u>	<u>Scope of Program</u>
Export Commodities	Federal & Domestic Certification	6,982 certificates issued
Export Seed	Field Inspection	902 sites/20,533 acres

Pest Eradication

<u>Pest</u>	<u>Agent/Mechanism</u>	<u>Scope of Program</u>
Distaff Thistle	Chemical, Mechanical	1 site
Heart Podded Hoary Cress	Chemical, Mechanical	1 site
Iberian Thistle	Chemical, Mechanical	1 site
Japanese Dodder	Chemical, Mechanical	2 sites
Oblong Spurge	Chemical, Mechanical	2 sites (1 site eradicated)
Purple Loosestrife	Chemical, Mechanical	Countywide
Purple Starthistle	Chemical, Mechanical	Countywide
Russian Knapweed	Chemical, Mechanical	Countywide
Skeleton Weed	Chemical, Mechanical	1 site

Organic Farming

Number of Registered Farms:

100 farms registered organic

20 farms certified organic by Yolo Certified Organic Agriculture (YCOA)

Yolo County Community Supported Agriculture (cont.)

Live Oak Farm

Live Oak Farm is a small organic farm located in the Capay Valley. They grow a variety of vegetables, fruits, nuts, olives for olive oil, and flowers.

P.O. Box 73, Rumsey, CA 95679
3880 Hwy 16, Rumsey, CA
(530) 796-4084

Pacific Star Gardens

Owned by Robert & Debra Ramming.

20872 County Road 99, Woodland, CA 95695
(530) 666-4686
www.pacificstargardens.webs.com

Riverdog Farm

Owned by partners Trini Campbell & Tim Mueller, Riverdog produces a wide variety of organic fruits, vegetables, and flowers on 200 acres in the Capay Valley.

P.O. Box 42, Guinda, CA 95637
(530) 796-3802
www.riverdogfarm.com

Terra Firma Farm

Founded by co-owner Paul Holmes in 1990, Terra Firma started on one acre outside Winters. In 1994, Paul Underhill joined as a partner, and today, Terra Firma is a 99 acre organic fruit and vegetable farm.

P.O. Box 836, Winters, CA 95694
(530) 756-2800

Yolo County Certified Farmers Markets

The certified farmers market concept is an effort to re-establish the traditional link between farmers and consumers. Certified farmers markets are locations approved by the agricultural commissioner where certified farmers offer for sale only those agricultural products they grow themselves.

Davis Farmers Market

Central Park
4th & C Street, Davis

March through October
Wednesdays 4:30 p.m. to 8:30 p.m.
Saturdays 8:00 a.m. to 1:00 p.m.

November through February
Wednesdays 2:00 p.m. to 6:00 p.m.
Saturdays 8:00 a.m. to 1:00 p.m.

www.davisfarmersmarket.org

East Quad Farmers Market

Northeast Quad
University of California, Davis

March through June
Wednesdays 10:00 a.m. to 2:30 p.m.

September through November
Wednesdays 10:00 a.m. to 2:30 p.m.

West Sacramento Farmers Market

1271 West Capitol Avenue, West Sacramento

May through October
Thursdays 4:30 p.m. to 7:30 p.m.

Woodland Certified Farmers Market

Freeman Park
Main Street between 4th and 6th Streets, Woodland

May through October
Saturdays 9:00 a.m. to 12:00 p.m.

Woodland Certified Farmers Market Woodland Healthcare Campus

1325 Cottonwood Street, Woodland

May through October
Tuesdays 4:30 p.m. – 7:00 p.m.

Gene Miyao

University of California Yolo County Farm Advisor

Yolo County is my home. My schooling began in Elkhorn as a preschooler followed by elementary and high school in Clarksburg. I graduated from Delta High School in 1968. My brother and I were the first generation in our family to attend college. I studied plant science and agricultural economics as an undergraduate at the University of California at Davis and earned a Masters in Agricultural Economics also from UCD in 1973.

I grew up on a small farm in Clarksburg where my father grew tomatoes. I recall as youngsters, my brother and I would have assignments on the farm. One of the initial chores was to carefully place a small aluminum gadget at the headland of each row to irrigate. These were gate valves to regulate water flow from two inch diameter pipe, which our father would siphon. We learned to drive on those dusty farm roads. The vehicle was a two-ton truck that was challenging to reach the clutch, as well as the brake pedal. I think we sat on extra cushions so we could peer above the steering wheel to see the road in front. Later, as we were in elementary school, we would drive the 'bobtail' truck to collect and redistribute empty wooden lug boxes to new, unpicked rows in tomato fields at harvest. We learned to drive tractors as well at an early age. Of course we did our share of hand weeding.

Upon graduation from college, I worked with my parents on the farm until 1980. I recall my parents, especially my mother, would telephone or visit with UC Yolo County Farm Advisor Mel Zobel for advice. On the farm, I had witnessed the transition from bare-root transplants to direct field seeding. I was too young to understand the process at the time, but I saw my parents construct cold frames to start seedlings and produce transplants for the field. And later, there was the abrupt transition from hand to mechanical harvesting. During that time, the network of information was both from watching other growers as well as gathering information from the University, especially from Mel Zobel. The applied field research and the sharing of that information had a huge appeal to me.

As a young farmer, the process for me was either to scale up the farm or move on. The decision to stop farming was difficult, as it still is for most growers. The job at the University has yielded many rewards.

As a Yolo County Farm Advisor, I have met and worked with many growers and industry folks. Clearly, our region has a group of interesting growers and agriculturalists that are progressive in trying new ideas. I especially was blessed in the early years with mentoring individuals who also helped to guide me: Tom Kearney, Carl Schoner, Dennis Hall, Ken Kimble, Jack Hills and Gail Nishimoto, Hideo and Mas Sagara and family, Bernell Harlan, John Wetzel, Jack Meek, Bill Merwin, Tony Turkovich, Archie Robinson and Chuck Dudley of Heidrick Farms, George Aoki, Paul Thomas, Roger Scriven, Kim Timothy and many others. Over the years, there have been many rich collaborations. Fellow advisors and UC colleagues have been supportive team builders.

In the early years, yields averaged 20 tons per acre or so. Over the span of 50 years, prompted initially by mechanization of the harvest, so many improvements have been made led by variety development, especially hybrids, and by cultural practice changes. Fall bedding was a major shift that reduced soil compaction. Vacuum seeders brought about more precise seeding rates. Better herbicides and pest management have been developed. Equipment became more dependable and tractors more powerful and efficient. Laser leveling increased irrigation uniformity and more attention was paid to irrigation management. GPS systems and drip irrigation have changed the management system.

What does the next 50 years hold? I think industry yields will routinely breach the 100 ton per acre level from the current 40+ ton per acre average. I suspect that soil microbial interactions will become more important as root systems will be managed more carefully. Tomatoes will still be widely grown—organically, conventionally and all sustainably.

While we at the University are struggling over operating budgets, statewide and locally, we hope the cooperative spirit between our public university and private local industry will weather the storm to keep farmers in the forefront of technological advances and production challenges and to keep consumers well stocked with affordable high quality produce.

Long live King Tomato!

Board of Supervisors

Supervisor Matt Rexroad, Chair, District 3

Supervisor Mike McGowan, District 1

Supervisor Don Saylor, District 2

Supervisor Jim Provenza, District 4

Supervisor Duane Chamberlain, District 5
