Subject: DATE CORRECTION 2012 UC Soil Fertility Short Course

Sorry about this... the event is on Nov. 28, 2012 (not Nov. 22.)

Mark your calendar!

If you missed... the February 2012 course, be sure to sign up for this one. The **UC Soil Fertility Short Course** will be repeated on **Wednesday, November 28, 2012** at the Buehler Alumni & Visitor Center, UC Davis. Register early before the course sells out—enrollment is limited.

The **UC Soil Fertility Short Course** will focus on the practical aspects of soil fertility management in an era of escalating fertilizer costs and increasing government regulation of nutrient inputs for environmental water quality protection. Topics covered include getting the maximum value from soil testing, interpretation of laboratory soil test results, comparing fertilizer sources, developing crop nutrient management plans, and fertilizer management and environmental protection. Although the focus will be on nutrient management in annual cropping systems, much of the material presented will be relevant to perennial crops as well.

The program is intended for growers, certified crop advisers (CCA), pest control advisers, government agency personnel, and others involved in fertility management planning. Take advantage of the early-bird registration fee (\$125). The fee goes up on Oct. 29 to \$150. The registration fee includes lunch, refreshments and study materials.

The course is approved for California CCA continuing education credits. Cooperative Extension specialists **Tim Hartz** (vegetable crops) and **Stu Pettygrove** (soils) are the instructors. The course is sponsored by the UC Vegetable Research & Information Center (VRIC).
