

# UCCE and the Center for Applied Horticultural Research Presents

## Pest Monitoring in Ornamental Plant Production (in English)

**WHEN:** Tuesday, October 30, 2012 - 8:00AM to 2:00PM

**WHERE:** Center for Applied Horticulture Research Conference Room,  
2280 Tamara Lane, San Marcos, CA 92069 USA

**COST:** \$90 \*\* Continental Breakfast and Lunch Provided \*\* Each attendee will be provided a binder with two extensive handouts on common pests of ornamentals and effective monitoring techniques. In addition, they will receive a 10X hand lens and a poster full of photos of the common pests and natural enemies with legends.

7:30 - 8:00AM	<b>Registration and Introduction</b>	Continental breakfast with friends
8:00 - 8:40AM	<b>Basic Entomology</b>	What is an insect? What makes an insect different than a mite, a spider, a crab, a snail, a slug? What do the good guys look like?
8:40 - 9:30AM	<b>Identification of Common Pest Damage</b>	Training on the use of the microscope and hands on training in the identification of pest insects.
9:30 - 10:00AM	<b>Monitoring and Record Keeping</b>	Examples of monitoring methods used for different pests in ornamental plant production and examples of pest id on yellow sticky cards will be presented.
10:00 - 10:20AM	<b>Break</b>	
10:20 - 11:00AM	<b>Basics of Integrated Pest Management</b>	Monitoring is a key component in pest management, so different types of monitoring techniques will be displayed. In addition, the type of damage present can identify some pest problems. Therefore, different types of pest damage will be on hand as examples.
11:00-11:45AM	<b>Field Collection of Pests and Damage (Altman Plants)</b>	In this presentation, all of the common pests of ornamental horticulture will be presented and described.
11:45-12:00PM	<b>Microscope Identification of Collected Pests</b>	Hands on identification of plant damage and collected specimens from the field collections.
12:00 - 12:45 PM	<b>Lunch</b>	Lunch is served
12:45 - 2:00PM	<b>Common Pests of Ornamental Plant Production</b>	Slide presentation of the common pests seen in ornamental plant production
