Sustainability

An important aspect of PSE site activities is setting them up so that the benefits generated from them are maintained over time. The sustainability section focuses on the labor involved in sustaining and maintaining PSE work at this site for the current reporting period.

1. To document sustainability efforts you must first indicate whether or not any efforts were taken during the current reporting period to support.
2. If no sustainability efforts were taken you can select "No" and move on to the "Reflection" section. However, if efforts were taken, then you will need to fill out the form indicating which intervention components and/or activities have been put in place for the continued achievement of desirable intervention and population outcomes (sustainability mechanisms). This is the only required section of the page. You have the option of selecting the levels of government that feature policies which require the PSE changes be maintained and selecting the stakeholder groups whose support will help sustain the effort. If you used a sustainability framework or assessment tool for this site during the current reporting year you will enter it here and provide a brief assessment fo your results.
3. Click **Save** to finalize the entry or **Save and continue** to navigate to the "Reflection" section.
