News

TO JUMP-START LOCAL ECONOMIES, UC ANR PARTNERS WITH CALIFORNIA STEWARDSHIP NETWORK

The University of California Agriculture and Natural Resources is pleased to announce a new partnership with the California Stewardship Network to accelerate economic recovery across the state by tapping expertise in broadband development, small-business acumen, agricultural technology and more.

New Off-Ground Harvest Research Incorporates Precision Yield Monitoring for Improved Orchard Management

Off-ground harvest is continuing to advance as a viable method for harvesting almonds in California, and a new UC Davis research project is using precision agriculture technologies to further capitalize on its benefits.

Carbon in Soils with Mae Culumber

This episode was originally intended to be part of the climate change series, but ended up being more appropriate as a stand alone episode. Phoebe and Mae Culumber (UCCE Fresno County) discuss the importance of carbon in soil quality, as well as explains some research she's doing on the role of nitrogen in whole orchard recycling.

Events
