

Integrating poultry in vegetable rotations:

What poultry density is needed to increase crop yields?

Our programs offer beginning farmers the opportunity to learn from experts about integrated crop-poultry production. Go to our course registration form to learn more and sign up for the webinars!

Session 2
July 28, 2023
PDT: 2:00 PM
CDT: 4:00 PM
EDT: 5:00 PM

Agenda

- Background on poultry integration into vegetable production
- Rotational grazing and movable pens
- How to estimate poultry density within pastures
- Experimental results evaluating broiler density and vegetable yield
- Other management considerations

With guest speaker Dr. David Gonthier
