

Body of Work Plan

- ① Promote an understanding of citizenship and how it can be applied.
- ② I will teach others about what citizenship is, like governmental and communal responsibilities. I will also teach them about how to carry out those responsibilities (examples).
- ③ As far as I know, I will need ~~no~~ a projector, possible paper copies
- ④ I can have photos taken of me at club visits, and/or presentation day, or possibly create a powerpoint.
- ⑤ I could have a "quiz" passed out to my audience to make sure they pay attention and to measure how much they learned
- ⑥ If I do the powerpoint, I will need a projector
- ⑦ All 4-Hers will benefit, whatever clubs I visit I hope will benefit, and the Leaders Council will visit because I hope I can inspire them to go County Council meetings
- ⑧ Fitting everything (club visits) into my

schedule will be difficult, as well
as prioritizing time

⑨ My other commitments. (football, school)
I hope to overcome this by time
prioritization.

Quiz - paper or vscat

Summary

Cole Burk

Body of Work Plan

1. Two goals for my body of work are to promote an understanding of citizenship and how it is applied.
2. In my activity, I will teach other about what citizenship is, like governmental and communal responsibilities. I will also teach them about how to carry out those responsibilities.
3. All I will need for my activity is copies of a paper quiz I will provide.
4. I can have photos taken of me at club visits, and/or presentation day, or possibly create a powerpoint.
5. I could have a “quiz” passed out to my audience to make sure they pay attention and to measure how much they learned.
6. Just the copies of the “quiz” from question 5.
7. All 4-Hers will benefit from whomever hears my presentation at any club. The Leaders Council may benefit from visits from the 4-Hers inspired by my activity.
8. My only obstacle, as I can see, would be fitting club visits and meetings into my busy schedule, which goes along with prioritizing my time.
9. My other commitments, like sports and school, which I hope to overcome by prioritizing my time.

Responsibility Quiz

Name: _____

Club: _____

Fill out each question to the best of your ability. Each question ties back to my session presentation, so it shouldn't be too hard. If you need help, feel free to ask a neighbor, but don't shout across the room.

What responsibilities has 4-H taught you?

Why is responsibility important in 4-H?

Is voting a responsibility as a citizen of the US government?

What is one example of a responsibility as a member of a 4-H community? (Animals? Offices? Committees?)

Cole Burk

Body of Work Wrap Up Sheet

1. I completed my plan by going to several club visits and watching a few city council meetings, as well as using my activity at the CTA Extravaganza.
2. I helped build up my teamworking skills and learn about how the County level of 4-H works. Others, who participated in my activity, learned about our political and communal responsibilities in and out of 4-H, and why they are so important.
3. I feel the only weakness of my activity was that I didn't plan for how little time I actually had, so if I did it again I would restructure my activity so the participants could fill out the quiz as I talked, rather than at the end.
4. I know for sure I reached all of San Benancio 4-H, as well as those at the CTA Extravaganza, and I probably minorly influenced some of the younger members when talking about the CTA program, so I would approximate 125-150 people at the most.
5. I do feel that my plan was successful, as I helped educate some 4-Hers as well as helped provide information to the county on the participants through the survey.
6. There isn't really much to it, just to make a activity and base it around how, if you were the target age group, you would want it to go.
7. If I were to change anything, it would be to have a bit more emphasis on the leadership training of the CTAs and the 4-H members taught by the CTA's activities. As far as completing my plan, I did have a lot of help and input from

both Kelly Violini and Mrs. Lurz, which helped formulate my activity from multiple viewpoints.
