County of San Diego

AIR POLLUTION CONTROL DISTRICT

The County of San Diego Air Pollution Control District (APCD) has helped agricultural equipment owners in San Diego County get cleaner engines, new equipment, and retrofit technologies to reduce diesel emissions. Businesses have benefitted from financial assistance to modernize their equipment while reducing diesel emissions.

Some projects that may qualify:

- ✓ Tractors, Utility Terrain Vehicles (UTV), and Other Agriculture Equipment Replacement (including electric options)
- ✓ Infrastructure Projects (electric agricultural pumps, electric charging stations, and associated electrical transmission equipment)
- ✓ Truck Replacements (including electric and low-NOx options)
- ✓ Projects for All Fleet Sizes

APCD has provided millions in grant funding for clean agriculture projects. Don't miss your opportunity to get funding toward cleaner equipment or trucks. You don't have to do it on your own—let us help!

Give us a call and one of our grant specialists will help you figure out how you may be able to get funding through one of our programs.

Add your email to our Air Quality Grants and Incentives listserv to receive information about funding opportunities as they become available!
