Creating Custom QR Codes in Canva

## 1. Login/Create a Canva Account -- the free version is sufficient!

- **https://www.canva.com/**

2. Select the "Create a design" tab
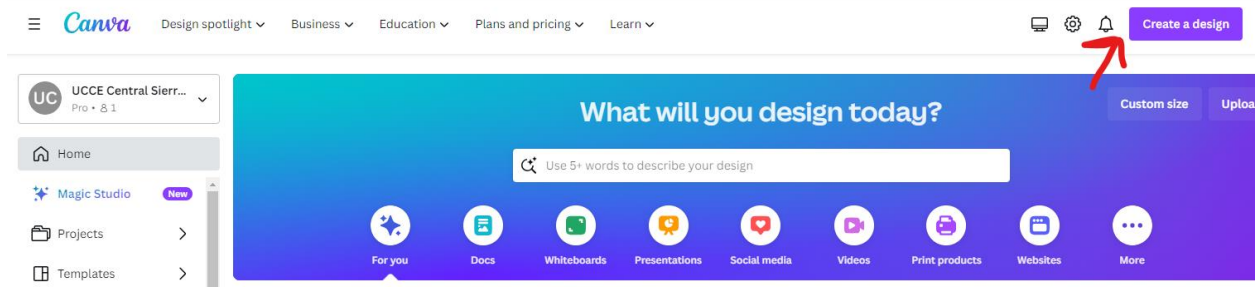

3.   Search for "label" and select Label (Square) 2 x 2 in

4. **From the side menu select the "Apps" tab and search "QR". Click on Dynamic QR.**

5. **Select your preferred template**

6. **Add your link, choose QR code color, background color and upload a logo if desired. You may also select a pattern to change the aesthetic.**

UCANR Color Palette

| Swatch										
HEX	005fae	fdbd10	3aa8e4	ab312c	67893e	003c61	956c26	d76f40	0aa9b3	9fc54d	f3cc30

Here is a resized logo that is less than 150kb

(Click on the image, the right-click and and select

"Save Image As..." to save to your computer:

**7. Click "Add to design"** (do not check the "Dynamic" box, this is a fee-based option that tracks clicks). Resize the QR code to fit the square.
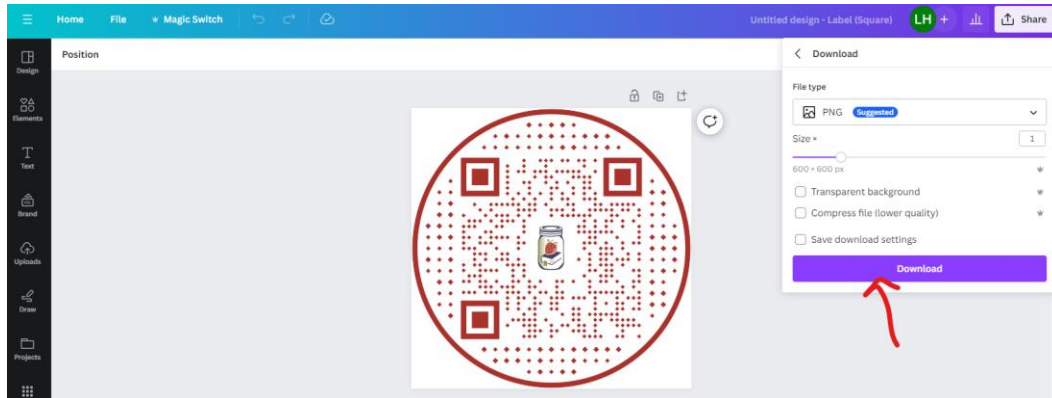

**TEST THE QR CODE!** Take out your phone and test to make sure the link is correct.

8. From the top menu select File > Download

9. Confirm the file type (it defaults to PNG) and click Download

10. The file will be downloaded, and you can click the download icon on your browser to open the file, or find in your computer's download folder

11. Be sure to rename your file (in your computer files and/or in Canva) so that you know what the QR code is for. Enjoy using QR codes to promote your classes and events, and direct people to your websites! 😊
