IN THIS ISSUE:

- ✓ February 21, 2012 meeting agenda
- ✓ Fat Tuesday lunch provided!
- ✓ CE units approved: 1.0 hours L&R and 1.0 "other"

Special Note:

This is the last year you can use methyl bromide.

Hotbeds begin soon. If you did not use methyl bromide for this year, improve weed management by using Devrinol herbicide at a rate of 12 oz per 1000 ft of bed in 5 - 6 gallons of water (sprayer calibrated at 30 gpa). Apply before the first irrigation and prior to the emergence of weeds. Incorporate with a brief irrigation — about 10 minutes will do. This gives about 80 - 90% suppression of most weeds and is safe on your plants.
